

STINGER™ 60100

Boom Truck Crane

FEATURES

- 60,000 lbs. (27 215 kg) maximum lifting capacity
- 110 ft. (33.5 m) maximum tip height
- 163 ft. (49.6 m) maximum tip height with 55 ft. (16.8 m) jib
- 100 ft. (30.5 m) fully proportional four-section telescopic "keel" boom
- Choice of three configurations – behind cab (with either 180° or 360° work area), rear mount or riding seat
- Easy-to-install optional 55 ft. (16.8 m) jib, man baskets or work platform increase job capabilities
- Exclusive color coded boom and load charts
- Electronic load moment indicator and anti-two-block device standard
- 2- speed winch has 15,000 lbs. (6 804 kg) maximum line pull, 101 fpm (31 m/min) line speed
- Externally located planetary rotation drive for easy accessibility for maintenance
- Dual operator stations with direct mechanically controlled hydraulic system (single station on RS model)
- 90 gal. (342 L) hydraulic tank
- Terex Support Plus product service

**simple, available and
cost effective™**

General Notes

- The operator must read and understand the Owner's Manual before operating this crane.
- Positioning or operation of crane beyond areas shown on this chart is not intended or approved except where specified in Owner's Manual.
- Loaded boom angles at specified boom lengths give only an approximation of the operating radius. The boom angle before loading should be greater to account for deflections. Do not exceed the operating radius for rated loads.
- Use rating of next longer boom for boom lengths not shown. Use rating of next greater radius for load radii not shown.
- Boom must be fully retracted when jib is erected before lowering below minimum angle. Retracted jib has no lifting capacity below a 50° boom angle.
- Use rating of next lower boom angle for boom angles not shown on jib load rating chart.
- Lifting off the main boom point while the swing around jib is erected is not intended or approved.
- Do not lower boom into this area, as hydraulic pressure will not allow raising the boom without retracting boom first.
- Crane load ratings on outriggers are based on freely suspended loads with the machine leveled and standing on a firm uniform supporting surface. No attempt shall be made to move a load horizontally on the ground in any direction.
- Practical working loads depend on supporting surface, wind and other factors affecting stability such as hazardous surroundings, experience of personnel, and proper handling, must all be taken into account by the operator.
- The maximum load which may be telescoped is limited by hydraulic pressure, boom angle, and boom lubrication. It is safe to attempt to telescope any load within the limits of the load rating chart.
- Deductions must be made from rated loads for stowed jib, optional attachments, hooks and loadblocks (see deduction chart). Weights of slings and other load handling devices shall be considered a part of the load.
- Crane load ratings with outriggers are based on outriggers and stabilizers extended and set with all load removed from the carrier wheels.
- Load ratings do not exceed 85% of tipping load.

DEFINITIONS

- Operating radius is the horizontal distance from the axis of rotation to the center of the vertical hoist line or load hook with load suspended.
- Loaded boom angle as shown in the Load Ratings Chart is the included angle between the horizontal and longitudinal axes of the boom base after lifting rated load at rated radius.

**CAUTION**

Overload and anti-two-block systems must be in good operating condition before operating crane. Refer to Owners Manual.

Keep at least 3 wraps of loadline on drum at all times.

Use only 5/8" diameter cable with 45,400 lb. breaking strength on this machine.

TEREX STINGER 60100

Boom Truck Crane

SPECIFICATIONS

Boom

100 ft. (30.5 m) four section full power mechanically synchronized boom. Patented keel boom design utilizes a keel-shaped baseplate combined with a deep, four plate boom section to optimize strength / rigidity-to-weight ratio. Exclusive, patented color-coded boom and load charts allow the operator to easily and quickly determine boom extension, boom angle and load capacity. Maximum tip height with four section 100 ft. (30.5 m) boom is 110 ft. (33.5 m). Maximum tip height with optional two-stage 55 ft. (16.76 m) jib is 163 ft. (49.6 m).

Winch

Hydraulic winch with gear motor and planetary reduction gearing provides 2-speed "burst of speed" operation. First layer rope pull is 15,000 lbs. (6 804 kg). Wire rope size is 5/8" (16 mm) with 45,400 lbs. (20 593 kg) breaking strength.

Operating Speeds

Main frame / turret assembly planetary rotation provides 180° rotation (370° with optional front bumper outrigger). Swing rotation is 75 seconds. Boom up/down is 60/41 seconds and boom extend/retract is 108/50 seconds.

Hydraulics

Three section pump allows the operator to perform simultaneous crane operations (winch, boom and swing). Capacities are 32, 17 and 8 gpm (122, 64 and 30 L/min). Combined system capacity is 67 gpm (253.6 L/min).

Controls

Fully proportional, excellent metering characteristics for precise boom movements. Independent outrigger controls allows the crane to be stable and level in rigorous working conditions. Load Moment Indicating System has audio alarm and functional shut down when operator encounters an overload situation.

Outriggers

Front and rear outriggers are heavy-duty, out and down type. Front spread is 24 ft. (7.32 m) for exceptional stability. Rear spread is 17' 9" (5.4 m).

Subframe

Cross-braced, closed-box style subframe yields greater strength and rigidity. Wheel base for standard truck crane mounting configuration is 261 in. (6.63 m).

OPTIONS AND ACCESSORIES

Terex Stinger offers a wide range of options and accessories to customize your truck crane to your exact needs.

These include:

- Single and two-stage jibs
- Multi-part load blocks
- Auxiliary winch
- Spin-resistant load line
- Wood, steel or extra heavy duty steel flatbeds
- Radio remote controls
- One-man or two-man baskets
- Self-leveling work platform
- Winch drum tensioner
- Continuous rotation (standard on RS model)
- Oil cooler
- Rear bumper
- Single front bumper outrigger (required for continuous or 370° rotation on BT or RM models)
- Hydraulic hose reel
- Hydraulic auxiliary tool circuit
- Removeable cab (RS model only)
